

Personal beliefs & experience influence how assessment is viewed and used. They also influence the expectations of teachers, students & parents.

Assessment is integral to all  
planning, teaching & learning.

Assessment addresses all of the  
essential elements.

The school provides evidence of  
student learning over time  
across the curriculum.

Effective assessment of prior  
knowledge & understanding  
informs teaching learning.

Formative & Summative  
assessment supports student  
learning and provides evidence  
of the efficacy of planning &  
teaching.

Establishing essential  
assessment agreements on  
assessment, evaluation &  
reporting increases consistency  
of practices.

Self & Peer assessment enables  
students to reflect on their  
learning & allows them to  
become self-directed learners.

Assessment tools & strategies  
should be varied & balanced.

Reporting involves students,  
teachers & parents & reflects the  
PYP.

Critical consideration of  
assessment data is a means of  
evaluation of teaching & learning  
and consequently the  
effectiveness of the programme.

Understanding of assessment  
may be enhanced through other  
IB professional development.
